MIELE F1 FEATURES

Tomato plum characterized by the **high quality of the fruits**.

Well balanced plant with balanced leaf coverage. The fruits are regular and the average weight is **18 grams** inserted elegantly on a herringbone cluster.

Characterized by a very high °**Brix**, the berries have both a shiny red colour and a **high tolerance to cracking**.
Ideal for long cycles.

RESISTANCE

HR: Va, Vd, FoI0, ToMV

IR: Ma Mi, Mj – nematodes, TYLCV

LIMITATIONS

The information contained in this leaflet is not intended to be exhaustive nor should it be considered as advice, guide or recommendation. They represent, more simply, the average results achieved during the tests carried out by the Fenix S.r.l. and are not applicable or adaptable to all cultural and pedoclimatic conditions. The terms "high resistance" (HR) and "intermediate resistance" (IR) do not imply plant immunity as better defined by the document produced by the ISF (International Seed Federation). Fenix S.r.l. does not provide guarantees with regard to return, performance, marketability, suitability for a particular purpose or otherwise. The photos used are purely indicative.
